Quality Awards

Quality assurance is an integral part of the Champion Laboratories mission, and as a result, Luber-finer products are designed and manufactured to quality standards unmatched in the industry. We have received many prestigious awards as testimony to that commitment:

- Ford Q1 Quality Award since 1984
- Ford Romeo Engine Plant Quality Award
- Mercury Marine Supplier Quality Award
- New Holland Qualitas - Quality Excellence
- Chrysler Gold Award
- Chrysler Q - Excellence Award
- Porsche System Audit Award
- GM Targets for Excellence Award
- GM Supplier of the Year Award
- John Deere Quality Certification Award
- Defense Construction Supply Center Quality Performance Recognition
- International - Certificate of Quality Recognition Award
- Target Vendor Award of Excellence
- AutoZone Vendor of the Year 2000
- Caterpillar Certified Supplier Award
- Kohler Engines - Recognition of Total Quality Systems Award
- VW/Audi - Quality Award
- Mighty Distributing - Excellence in Service 2000
- Mighty Distributing - Supplier of the Year 2001
- Parts Plus - Supplier of the Year 2002
- TS 16949: 2002 Registration - Vehicle Certification Agency

HEAVY DUTY CABIN AIR FILTERS

Luber-finer Cabin Air Filters—help you breathe clean

You can protect yourself and any passengers in the cab of your truck from dust, smog and pollen, by changing cabin air filters. Cabin air filters from Luber-finer offer superior performance and long life.

A Luber-finer cabin air filter helps trap bacteria, dust, pollen and exhaust gases that come through your truck's ventilation system. Cabin filters are particularly beneficial for people with allergies.

Luber-finer cabin air filters should be replaced according to owners' manual guidelines. You may want to change the filters on a seasonal basis because of the pollutants created in different seasons.

TOP 5 CABIN AIR "FAQ'S"

Why do people need cabin air filters?

Think of them as an air filter that cleans air before it enters the cab's interior through the heating, air conditioning or fresh air systems. The filters remove allergens and pollutants before they get into the cab and before the driver and passengers can inhale them. Roadside

air contains significant numbers of contaminants such as pollen, dust, diesel soot, and smog, and the contaminants are two to six times more concentrated inside the cab than outside.

Does the filter help allergy sufferers?

Yes. The filter traps virtually all pollen and dust particles that may cause allergic reactions. Such particles are generally 7 to 100 microns in diameter. A dot made with a sharp pencil is huge at 200 microns.

The filters greatly reduce the amount of dust and pollutants entering the cab, so inside glass, dashboards, heating, ventilating and air conditioning systems do tend to stay cleaner.

How does the filter work?

Filter fibers are electrostatically charged, allowing the filter to work at higher efficiency because it attracts and holds contaminants within the media. This reduces the chance of surface clogging and allows the filter to last longer.

The filter screens out virtually all particles two microns in diameter and larger. A human hair is between 80 and 100 microns in diameter, so many of these

THIS IS YOUR OVER THE ROAD HOME AWAY FROM HOME... BREATHE EASIER, BREATHE CLEANER WITH LUBER-FINER HEAVY DUTY CABIN AIR FILTERS.

- Traps Nearly 100% of Harmful Pollutants Before They Reach Your Vehicle's Interior
- Original Equipment Fit and Quality For Cleaner, Healthier Passenger Cabin Air.
- Provides Cleaner Air To Allergy and Asthma Sufferers.
- Most Cabin Air Filter Changes Take Less Than 15 Minutes.

particles are invisible to the naked eye. Like any other filter, Luber-finer cabin air filters need to be changed at routine intervals, following the vehicle manufacturer's recommendation.

What happens if the filter is not changed?

Air will still flow into the passenger cabin through the heating, air conditioning and fresh air systems. Once the filter media is saturated with contaminants, however, the pollutants and allergens may start entering the passenger cabin as well.

How effective are Luber-finer cabin air filters?

Luber-finer heavy-duty cabin air filters meet, and more often exceed, original equipment requirements for fit, function and performance. These filters are extremely efficient. They remove up to 99.5% of allergen contaminants from outside air.

WARRANTY

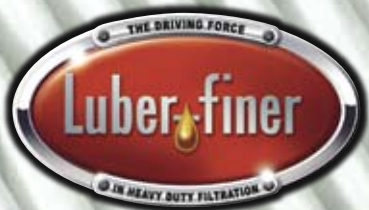

Luber-finer filters are guaranteed to be free from defects in material and workmanship.

In the event of an engine or equipment failure directly caused by a proven defective Luber-finer filter, which was properly installed and changed following the engine or equipment manufacturer's recommended service intervals, Luber-finer will restore the engine or equipment to a condition equivalent to that existing just before the failure.

Claims for engine or equipment repairs provided under this warranty must be submitted within 30 days after discovery of damage. Luber-finer Technical Services Department reserves the right to examine the engine or equipment and filter to determine the amount of damage and whether it was caused by a defective Luber-finer filter.

This warranty gives you specific legal rights. You may have other rights which vary from state to state.

Engine and equipment manufacturers' warranties remain in effect when Luber-finer filters are used.
